

ATRIP rabbit monoclonal antibody

Catalog # H00084126-K Size 100 ug x up to 3

Specification	
Product Description	Rabbit monoclonal antibody raised against a human ATRIP peptide using ARM Technology.
Immunogen	A synthetic peptide of human ATRIP is used for rabbit immunization. Customer or Abnova will decide on the preferred peptide sequence.
Host	Rabbit
Library Construction	Non-fusion antibody library from rabbit spleen (<u>ARM Technology</u>).
Expression	Overexpression vector and transfection into 293H cell line.
Reactivity	Human
Purification	Protein A
Isotype	lgG
Quality Control Testing	Antibody reactive against human ATRIP peptide by ELISA and mammalian transfected lysate by We stern Blot.
Storage Buffer	In 1x PBS, pH 7.4
Storage Instruction	Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.
Deliverable	Up to three rabbit lgG clones of 100 ug each will be delivered to customer.
Note	 Customer may provide cell or tissue lysate for antibody screening. Rabbit monoclonal antibody generated by ARM technology is amenable to antibody engineering in cluding F(ab)₂, lgG, scFv and different Fc and non-Fc conjugates per customer request.

Applications

Western Blot (Transfected lysate)

Protocol Download

ELISA

Gene Info — ATRIP	
Entrez GenelD	<u>84126</u>
GeneBank Accession#	ATRIP
Gene Name	ATRIP
Gene Alias	DKFZp762J2115, FLJ12343, MGC20625, MGC21482, MGC26740
Gene Description	ATR interacting protein
Omim ID	<u>606605</u>
Gene Ontology	<u>Hyperlink</u>
Gene Summary	The product of this gene is an essential component of the DNA damage checkpoint, and binds to single-stranded DNA coated with replication protein A that accumulates at sites of DNA damage. The encoded protein interacts with the ataxia telangiectasia and Rad3 related protein, a checkpoint kinase, resulting in accumulation of the kinase at intranuclear foci induced by DNA damage. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq
