

## Full-Length

## UNC119B (Human) Recombinant Protein (P01)

Catalog # H00084747-P01

Size 50 ug

## Specification

|                      |                                                                                                               |
|----------------------|---------------------------------------------------------------------------------------------------------------|
| Product Description  | Human UNC119B full-length ORF ( ABM87649.1, 1 a.a. - 33 a.a.) recombinant protein with GST-tag at N-terminal. |
| Sequence             | MRTVCPEIHRTDSSPQCTRIPVASGAAVPGVGA                                                                             |
| Host                 | Wheat Germ (in vitro)                                                                                         |
| Theoretical MW (kDa) | 30.03                                                                                                         |
| Preparation Method   | <a href="#">in vitro wheat germ expression system</a>                                                         |
| Purification         | Glutathione Sepharose 4 Fast Flow                                                                             |
| Storage Buffer       | 50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.                                      |
| Storage Instruction  | Store at -80°C. Aliquot to avoid repeated freezing and thawing.                                               |
| Note                 | Best use within three months from the date of receipt of this protein.                                        |

## Applications

- Enzyme-linked Immunoabsorbent Assay
- Western Blot (Recombinant protein)
- Antibody Production
- Protein Array

## Gene Info — UNC119B

|                     |                                                              |
