

DNAxPAb

Hard-to-Find
Antibody

HAVCR2 DNAxPab

Catalog # H00084868-W01P Size 200 ug

Specification

Product Description	Rabbit polyclonal antibody raised against a partial-length human HAVCR2 DNA using DNAx™ Immune technology.
Technology	DNAx™ Immune
Immunogen	Extracellular membrane domain (ECD) human DNA
Host	Rabbit
Reactivity	Human
Purification	Protein A
Quality Control Testing	Antibody reactive against mammalian transfected lysate.
Storage Buffer	In 1x PBS, pH 7.4
Storage Instruction	Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Applications

- Western Blot (Transfected lysate)

[Protocol Download](#)

- Immunofluorescence (Transfected cell)
- Flow Cytometry (Transfected cell)

Gene Info — HAVCR2

Entrez GeneID	84868
GeneBank Accession#	BC020843.1
Protein Accession#	AAH20843.1
Gene Name	HAVCR2
Gene Alias	FLJ14428, KIM-3, TIM3, TIMD3, Tim-3
Gene Description	hepatitis A virus cellular receptor 2
Omim ID	606652
Gene Ontology	Hyperlink
Gene Summary	CD4 (MIM 186940)-positive T helper lymphocytes can be divided into types 1 (Th1) and 2 (Th2) on the basis of their cytokine secretion patterns. Th1 cells and their associated cytokines are involved in cell-mediated immunity to intracellular pathogens and delayed-type hypersensitivity reactions, whereas Th2 cells are involved in the control of extracellular helminthic infections and the promotion of atopic and allergic diseases. The 2 types of cells also cross-regulate the functions of the other. TIM3 is a Th1-specific cell surface protein that regulates macrophage activation and enhances the severity of experimental autoimmune encephalomyelitis in mice.[supplied by OMIM]
Other Designations	T cell immunoglobulin mucin 3 T cell immunoglobulin mucin-3 kidney injury molecule-3
