Gene Description	erythroblast membrane-associated protein (Scianna blood group)
Omim ID	111620 111750 609017
Gene Ontology	Hyperlink
Gene Summary	The protein encoded by this gene is a cell surface transmembrane protein that may act as an erythroid cell receptor, possibly as a mediator of cell adhesion. Polymorphisms in this gene are responsible for the Scianna/Radin blood group system. Two transcript variants encoding the same protein have been found for this gene. [provided by RefSeq]
