Gene Alias FLJ40908, FLJ44184, hFKHLA

Gene Description forkhead box P4

Omim ID [608924](#)

Gene Ontology [Hyperlink](#)

Gene Summary This gene belongs to subfamily P of the forkhead box (FOX) transcription factor family. Forkhead box transcription factors play important roles in the regulation of tissue- and cell type-specific gene transcription during both development and adulthood. Many members of the forkhead box gene family, including members of subfamily P, have roles in mammalian oncogenesis. This gene may play a role in the development of tumors of the kidney and larynx. Alternative splicing of this gene produces multiple transcript variants, some encoding different isoforms. [provided by RefSeq]
