OR8I2 rabbit monoclonal antibody

Catalog # H00120586-K

Specification

Size 100 ug x up to 3

Specification	
Product Description	Rabbit monoclonal antibody raised against a human OR8I2 peptide using ARM Technology.
Immunogen	A synthetic peptide of human OR8/2 is used for rabbit immunization. Customer or Abnova will decide on the preferred peptide sequence.
Host	Rabbit
Library Construction	Non-fusion antibody library from rabbit spleen (ARM Technology).
Expression	Overexpression vector and transfection into 293H cell line.
Reactivity	Human
Purification	Protein A
lsotype	lgG
Quality Control Testing	Antibody reactive against human OR8l2 peptide by ELISA and mammalian transfected lysate by We stern Blot.
Storage Buffer	In 1x PBS, pH 7.4
Storage Instruction	Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.
Deliverable	Up to three rabbit IgG clones of 100 ug each will be delivered to customer.
Note	 Customer may provide cell or tissue lysate for antibody screening. Rabbit monoclonal antibody generated by ARM technology is amenable to antibody engineering in cluding F(ab)₂, lgG, scFv and different Fc and non-Fc conjugates per customer request.

Applications

• Western Blot (Transfected lysate)

Protocol Download

• ELISA

Gene Info — OR8I2

y 8, subfamily I, member 2
ract with odorant molecules in the nose, to initiate a neuronal response that of a smell. The olfactory receptor proteins are members of a large family ceptors (GPCR) arising from single coding-exon genes. Olfactory receptor rane domain structure with many neurotransmitter and hormone receptors the recognition and G protein-mediated transduction of odorant signals. T are family is the largest in the genome. The nomenclature assigned to the s and proteins for this organism is independent of other organisms. [provid
