Gene Name ASB6

Gene Alias FLJ20548, MGC1024

Gene Description ankyrin repeat and SOCS box-containing 6

Gene Ontology [Hyperlink](#)

Gene Summary The protein encoded by this gene belongs to a family of ankyrin repeat proteins that, along with four other protein families, contain a C-terminal SOCS box motif. Growing evidence suggests that the SOCS box, similar to the F-box, acts as a bridge between specific substrate-binding domains and the more generic proteins that comprise a large family of E3 ubiquitin protein ligases.
