

RNF32 rabbit monoclonal antibody

Catalog # H00140545-K Size 100 ug x up to 3

Specification	
Product Description	Rabbit monoclonal antibody raised against a human RNF32 peptide using ARM Technology.
Immunogen	A synthetic peptide of human RNF32 is used for rabbit immunization. Customer or Abnova will decide on the preferred peptide sequence.
Host	Rabbit
Library Construction	Non-fusion antibody library from rabbit spleen (<u>ARM Technology</u>).
Expression	Overexpression vector and transfection into 293H cell line.
Reactivity	Human
Purification	Protein A
Isotype	lgG
Quality Control Testing	Antibody reactive against human RNF32 peptide by ELISA and mammalian transfected lysate by W estern Blot.
Storage Buffer	In 1x PBS, pH 7.4
Storage Instruction	Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.
Deliverable	Up to three rabbit lgG clones of 100 ug each will be delivered to customer.
Note	 Customer may provide cell or tissue lysate for antibody screening. Rabbit monoclonal antibody generated by ARM technology is amenable to antibody engineering in cluding F(ab)₂, lgG, scFv and different Fc and non-Fc conjugates per customer request.

Applications

Western Blot (Transfected lysate)

Protocol Download

ELISA

Gene Info — RNF32	
Entrez GenelD	140545
GeneBank Accession#	RNF32
Gene Name	RNF32
Gene Alias	FKSG33, HSD15
Gene Description	ring finger protein 32
Omim ID	610241
Gene Ontology	<u>Hyperlink</u>
Gene Summary	The protein encoded by this gene contains two RING ring finger motifs. RING finger motifs are pre sent in a variety of functionally distinct proteins and are known to be involved in protein-DNA or pr otein-protein interactions. This gene was found to be expressed during spermatogenesis, most lik ely in spermatocytes and/or in spermatids. Several alternatively spliced transcript variants exist, b ut their full length natures are not clear. [provided by RefSeq
