Gene Description

JAZF zinc finger 1

Omim ID[606246](#)**Gene Ontology**[Hyperlink](#)**Gene Summary**

This gene encodes a nuclear protein with three C2H2-type zinc fingers, and functions as a transcriptional repressor. Chromosomal aberrations involving this gene are associated with endometrial stromal tumors. Alternatively spliced variants which encode different protein isoforms have been described; however, not all variants have been fully characterized [provided by RefSeq]

Other Designations

TAK1-interacting protein 27|juxtaposed with another zinc finger gene 1
