

Methylated DNA Quantification Kit (Colorimetric)

Catalog # KA1510

Size 1 Kit

Applications

The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Specification

Product Description	Methylated DNA Quantification Kit (Colorimetric) is used for measuring methylated DNA.
Suitable Sample	DNA Extract
Sample Volume	1-8 uL (100 ng include)
Detection Method	Colorimetric
Calibration Range	50 to 200 ng
Limit of Detection	0.2 ng methylated DNA
Regulation Status	For research use only (RUO)
Quality Control Testing	<p>Standard Curve</p> <p>The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.</p>
Storage Instruction	Store ME3, ME4, ME6 and ME7 at -20°C away from light. Store ME1, ME5, ME8 and 8-Well Assay Strips at 4°C away from light. Store all other components at room temperature away from light.

Applications

- Quantification
