

EPOR (Human) Cell-Based ELISA Kit

Catalog # KA2841

Size 1 Kit

Specification

Product Description	EPOR (Human) Cell-Based ELISA Kit is an indirect enzyme-linked immunoassay for qualitative determination of EPOR expression in cultured cells.
Suitable Sample	Attached Cell, Loosely Attached Cell, Suspension Cell
Label	HRP-conjugated
Detection Method	Colorimetric
Assay Type	Qualitative
Reactivity	Human, Mouse, Rat
Regulation Status	For research use only (RUO)
Storage Instruction	Store the kit at 4°C.

Applications

- Qualitative

Gene Info — EPOR

Entrez GeneID	2057
Protein Accession#	P19235
Gene Name	EPOR
Gene Alias	MGC138358
Gene Description	erythropoietin receptor

Omim ID [133100 133171](#)

Gene Ontology [Hyperlink](#)

Gene Summary

The erythropoietin receptor is a member of the cytokine receptor family. Upon erythropoietin binding, the erythropoietin receptor activates Jak2 tyrosine kinase which activates different intracellular pathways including: Ras/MAP kinase, phosphatidylinositol 3-kinase and STAT transcription factors. The stimulated erythropoietin receptor appears to have a role in erythroid cell survival. Defects in the erythropoietin receptor may produce erythroleukemia and familial erythrocytosis. [provided by RefSeq]
