

Alcohol dehydrogenase Assay Kit

Catalog # KA3785

Size 1 Kit

Applications

Result Data

Result Data

ADH Activity (30 min, 25-20°C)

Specification

Product Description	Alcohol dehydrogenase Assay Kit is a quantitative colorimetric determination of alcohol dehydrogenase at 565 nm.
Suitable Sample	Culture Medium, Plasma, Serum, Tissue, Urine
Sample Volume	20 uL
Detection Method	Colorimetric
Assay Type	Quantitative
Calibration Range	0.4 - 80 U/L
Limit of Detection	0.1 U/L
Regulation Status	For research use only (RUO)
Storage Instruction	Store the kit at -20°C.
Note	Result Data Result Data ADH Activity (30 min, 25-20°C)

Applications

- Functional Study
