

Mammalian Chromatin Extraction Kit

Catalog # KA3925

Size 1 Kit

Applications

Result Data

Result Data

ChIP analysis of RNA polymerase II enriched in GAPDH and MLH1 promoters with chromatin extract prepared from formaldehyde fixed colon cancer cells (2×10^5).

Specification

Product Description	Mammalian Chromatin Extraction Kit is used for isolating chromatin or DNA-protein complex from mammalian cells or tissues.
Suitable Sample	Cell, Tissue
Reactivity	Mammals
Regulation Status	For research use only (RUO)
Storage Instruction	Store Protease Inhibitor cocktails at 4°C. Store remaining components at room temperature.
