

CCL2 (Human) ELISA Kit

Catalog # KA5701 Size 1 Kit

Applications

The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Specification

Product Description	CCL2 (Human) ELISA Kit is a sandwich enzyme-linked immunosorbent assay for quantitative detection of human MCP-1 in cell culture supernates, serum, plasma (heparin, EDTA, citrate) and urine.
Suitable Sample	Cell culture supernates, serum, plasma (heparin, EDTA, citrate) and urine
Sample Volume	100 μ L
Label	HRP-conjugated
Detection Method	Colorimetric
Assay Type	Quantitative
Calibration Range	15.6 to 1000 pg/mL
Reactivity	Human
Regulatory Status	For research use only (RUO)
Quality Control Testing	Standard curve The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.
Storage Instruction	Store at 4°C for 6 months, at -20°C for 12 months. Avoid multiple freeze-thaw cycles.

Applications

- Quantification

Gene Info — CCL2

Entrez GeneID [6347](#)

Gene Name CCL2

Gene Alias GDCF-2, HC11, HSMCR30, MCAF, MCP-1, MCP1, MGC9434, SCYA2, SMC-CF

Gene Description chemokine (C-C motif) ligand 2

Omim ID [158105](#) [182940](#) [607948](#) [609423](#)

Gene Ontology [Hyperlink](#)

Gene Summary This gene is one of several cytokine genes clustered on the q-arm of chromosome 17. Cytokines are a family of secreted proteins involved in immunoregulatory and inflammatory processes. The protein encoded by this gene is structurally related to the CXC subfamily of cytokines. Members of this subfamily are characterized by two cysteines separated by a single amino acid. This cytokine displays chemotactic activity for monocytes and basophils but not for neutrophils or eosinophils. It has been implicated in the pathogenesis of diseases characterized by monocytic infiltrates, like psoriasis, rheumatoid arthritis and atherosclerosis. It binds to chemokine receptors CCR2 and CCR4. [provided by RefSeq]

Other Designations monocyte chemoattractant protein-1|monocyte chemotactic and activating factor|monocyte chemotactic protein 1, homologous to mouse Sig-jel|monocyte secretory protein JE|small inducible cytokine A2|small inducible cytokine A2 (monocyte chemotactic protein 1,
