

Arginase Inhibitor Screening Kit

Catalog # KA6220

Size 1 Kit

Applications

Result Data

Result Data

□

ABH titration: Human Arginase I was incubated with various concentrations of ABH in 100 v/v% DMSO (final 10 v/v% DMSO in 50 uL reaction).

Specification

Product Description Arginase Inhibitor Screening Kit is colorimetric screening for arginase inhibitors.

Suitable Sample Arginase.

Detection Method Colorimetric

Regulatory Status For research use only (RUO)

Storage Instruction Store the Arginine Buffer at -20°C, and other components at 2-8°C. Avoid repeated freezing and thawing.
