

FastELISA™ MMP9 (Human) ELISA Kit

Catalog # KA7054

Size 1 Kit

Specification

Product Description	FastELISA™ MMP9 (Human) ELISA Kit is a sandwich enzyme immunoassay for the quantitative measurement of Human MMP9 (Matrix metalloproteinase 9) in Serum, plasma.
Suitable Sample	Serum, Plasma, etc.
Sample Volume	50 μ L
Detection Method	Colormetric
Assay Type	Quantitative
Calibration Range	1.25-80 ng/mL
Limit of Detection	1.25 ng/mL
Specificity	This assay is highly specific for detection of Human MMP9. No significant cross-reactivity or interference between Human MMP9 and analogues was observed.
Regulation Status	For research use only (RUO)
Storage Instruction	Store at 2-8°C for 6 months. For long term storage store at -20°C. Avoid repeated freezing and thawing.

Applications

- Quantification

Gene Info — MMP9

Entrez GeneID [4318](#)**Gene Name** MMP9

Gene Alias	CLG4B, GELB, MMP-9
Gene Description	matrix metalloproteinase 9 (gelatinase B, 92kDa gelatinase, 92kDa type IV collagenase)
Omim ID	120361
Gene Ontology	Hyperlink
Gene Summary	Proteins of the matrix metalloproteinase (MMP) family are involved in the breakdown of extracellular matrix in normal physiological processes, such as embryonic development, reproduction, and tissue remodeling, as well as in disease processes, such as arthritis and metastasis. Most MMP's are secreted as inactive proproteins which are activated when cleaved by extracellular proteinases. The enzyme encoded by this gene degrades type IV and V collagens. Studies in rhesus monkeys suggest that the enzyme is involved in IL-8-induced mobilization of hematopoietic progenitor cells from bone marrow, and murine studies suggest a role in tumor-associated tissue remodeling. [provided by RefSeq]
Other Designations	92kD type IV collagenase OTTHUMP00000031674 gelatinase B macrophage gelatinase matrix metalloproteinase 9 matrix metalloproteinase 9 (gelatinase B, 92kD gelatinase, 92kD type IV collagenase) matrix metalloproteinase 9 (gelatinase B, 92kDa gelatinase, 92kD
