

HLA-E monoclonal antibody, clone MEM-E/02

Catalog # MAB0939

Size 100 ug

Specification

Product Description	Mouse monoclonal antibody raised against partial recombinant HLA-E.
Immunogen	Recombinant protein corresponding to heavy chain region (denaturated) of human HLA-E.
Host	Mouse
Reactivity	Human, Primates
Specificity	This antibody specifically reacts with denaturated heavy chain of human HLA-E.
Form	Liquid
Isotype	IgG1
Recommend Usage	The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, pH 7.4 (0.09% sodium azide)
Storage Instruction	Store at 4°C. Do not freeze. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Western Blot
- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Gene Info — HLA-E

Entrez GeneID

[3133](#)

Gene Name	HLA-E
Gene Alias	DKFZp686P19218, EA1.2, EA2.1, HLA-6.2, MHC, QA1
Gene Description	major histocompatibility complex, class I, E
Omim ID	143010
Gene Ontology	Hyperlink
Gene Summary	HLA-E belongs to the HLA class I heavy chain paralogues. This class I molecule is a heterodimer consisting of a heavy chain and a light chain (beta-2 microglobulin). The heavy chain is anchored in the membrane. HLA-E binds a restricted subset of peptides derived from the leader peptides of other class I molecules. The heavy chain is approximately 45 kDa and its gene contains 8 exons. Exon one encodes the leader peptide, exons 2 and 3 encode the alpha1 and alpha2 domains, which both bind the peptide, exon 4 encodes the alpha3 domain, exon 5 encodes the transmembrane region, and exons 6 and 7 encode the cytoplasmic tail. [provided by RefSeq]
Other Designations	HLA class I histocompatibility antigen, E alpha chain MHC HLA-E alpha-1 MHC HLA-E alpha-2.1 MHC class I antigen OTTHUMP00000029214 lymphocyte antigen
