

SELP monoclonal antibody, clone Psel.KO.2.5

Catalog # MAB12584 Size 50 ug

Applications

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining (Formalin-fixed paraffin-embedded sections) of human tonsil with SELP monoclonal antibody, clone Psel.KO.2.5 (Cat # MAB12584) at 10 ug/mL working concentration.

Flow Cytometry

Flow cytometric analysis of activated human platelets with SELP monoclonal antibody, clone Psel.KO.2.5 (Cat # MAB12584).

Specification

Product Description	Mouse monoclonal antibody raised against human SELP.
Immunogen	SELP transfected 300.19 cells.
Host	Mouse
Reactivity	Human
Form	Liquid
Purification	Affinity purification
Isotype	IgG1

Recommend Usage	Flow Cytometry (1:1-1:50) Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) (10 ug/mL) Immunoprecipitation The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, pH 7.4 (0.09% sodium azide).
Storage Instruction	Store at 4°C. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining (Formalin-fixed paraffin-embedded sections) of human tonsil with SELP monoclonal antibody, clone Psel.KO.2.5 (Cat # MAB12584) at 10 ug/mL working concentration.

- Immunoprecipitation

- Flow Cytometry

Flow cytometric analysis of activated human platelets with SELP monoclonal antibody, clone Psel.KO.2.5 (Cat # MAB12584).

Gene Info — SELP

Entrez GeneID	6403
Gene Name	SELP
Gene Alias	CD62, CD62P, FLJ45155, GMP140, GRMP, LECAM3, PADGEM, PSEL
Gene Description	selectin P (granule membrane protein 140kDa, antigen CD62)
Omim ID	147050 173610
Gene Ontology	Hyperlink
Gene Summary	This gene encodes a 140 kDa protein that is stored in the alpha-granules of platelets and Weibel-Palade bodies of endothelial cells. This protein redistributes to the plasma membrane during platelet activation and degranulation and mediates the interaction of activated endothelial cells or platelets with leukocytes. The membrane protein is a calcium-dependent receptor that binds to sialylated forms of Lewis blood group carbohydrate antigens on neutrophils and monocytes. Alternative splice variants may occur but are not well documented. [provided by RefSeq]
