

CCR5 monoclonal antibody, clone T21/8

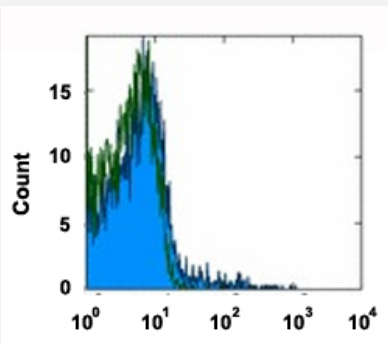

Catalog # MAB12618 Size 50 ug

Applications

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining (Formalin-fixed paraffin-embedded sections) of human tonsil with CCR5 monoclonal antibody, clone T21/8 (Cat # MAB12618) at 20 ug/mL working concentration.

Flow Cytometry

Flow cytometric analysis of human peripheral blood cells with CCR5 monoclonal antibody, clone T21/8 (Cat # MAB12618) (colored histogram) and an isotype control mouse IgG1, kappa (open histogram) followed by biotin-conjugated anti-mouse IgG secondary antibody and PE-conjugated streptavidin.

Specification

Product Description	Mouse monoclonal antibody raised against human CCR5.
Immunogen	Human CCR5
Host	Mouse
Reactivity	Human
Form	Liquid
Purification	Affinity purification
Isotype	IgG1, kappa

Recommend Usage	ELISA Flow Cytometry Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) (20 ug/mL) Immunoprecipitation Western Blot The optimal working dilution should be determined by the end user.
Storage Buffer	In aqueous buffer (Stabilizer, 0.09% sodium azide).
Storage Instruction	Store at 4°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Western Blot
- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)
Immunohistochemical staining (Formalin-fixed paraffin-embedded sections) of human tonsil with CCR5 monoclonal antibody, clone T21/8 (Cat # MAB12618) at 20 ug/mL working concentration.
- Immunoprecipitation
- Enzyme-linked Immunoabsorbent Assay
- Flow Cytometry
Flow cytometric analysis of human peripheral blood cells with CCR5 monoclonal antibody, clone T21/8 (Cat # MAB12618) (colored histogram) and an isotype control mouse IgG1, kappa (open histogram) followed by biotin-conjugated anti-mouse IgG secondary antibody and PE-conjugated streptavidin.

Gene Info — CCR5

Entrez GeneID	1234
Gene Name	CCR5
Gene Alias	CC-CKR-5, CCCR5, CD195, CKR-5, CKR5, CMKBR5, IDDM22
Gene Description	chemokine (C-C motif) receptor 5
Omim ID	601373 610379

Gene Ontology

Gene Summary

This gene encodes a member of the beta chemokine receptor family, which is predicted to be a seven transmembrane protein similar to G protein-coupled receptors. This protein is expressed by T cells and macrophages, and is known to be an important co-receptor for macrophage-tropic virus, including HIV, to enter host cells. Defective alleles of this gene have been associated with the HIV infection resistance. The ligands of this receptor include monocyte chemoattractant protein 2 (MCP-2), macrophage inflammatory protein 1 alpha (MIP-1 alpha), macrophage inflammatory protein 1 beta (MIP-1 beta) and regulated on activation normal T expressed and secreted protein (RANTES). Expression of this gene was also detected in a promyeloblastic cell line, suggesting that this protein may play a role in granulocyte lineage proliferation and differentiation. This gene is located at the chemokine receptor gene cluster region. Two transcript variants encoding the same protein have been found for this gene. [provided by RefSeq]
