

CCND1 monoclonal antibody, clone CCND1/809

Catalog # MAB14598 Size 100 ug

Applications

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining (Formalin-fixed paraffin-embedded sections) of (A) human mantle cell lymphoma and (B) human bladder carcinoma with CCND1 monoclonal antibody, clone CCND1/809 (Cat # MAB14598).

Flow Cytometry

Flow cytometric analysis of Jurkat cells with CCND1 monoclonal antibody, clone CCND1/809 (Cat # MAB14598) (Green). Black: cells alone; Grey: isotype control.

Specification

Product Description Mouse monoclonal antibody raised against full length recombinant human CCND1.

Immunogen Recombinant protein corresponding to full length human CCND1.

Host	Mouse
Theoretical MW (kDa)	36
Reactivity	Human
Form	Liquid
Purification	Protein A/G purification
Isotype	IgG2a, kappa
Recommend Usage	Flow Cytometry (0.5-1 ug/million cells in 0.1 mL) Immunofluorescence (1-2 ug/mL) Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) (0.5-1 ug/mL) Western Blot (0.5-1 ug/mL) The optimal working dilution should be determined by the end user.
Storage Buffer	In 10 mM PBS.
Storage Instruction	Store at -20 to -80°C. Aliquot to avoid repeated freezing and thawing.

Applications

- Western Blot
- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)
Immunohistochemical staining (Formalin-fixed paraffin-embedded sections) of (A) human mantle cell lymphoma and (B) human bladder carcinoma with CCND1 monoclonal antibody, clone CCND1/809 (Cat # MAB14598).
- Immunofluorescence
- Flow Cytometry
Flow cytometric analysis of Jurkat cells with CCND1 monoclonal antibody, clone CCND1/809 (Cat # MAB14598) (Green).
Black: cells alone; Grey: isotype control.

Gene Info — CCND1

Entrez GeneID	595
Protein Accession#	P24385
Gene Name	CCND1

Gene Alias	BCL1, D11S287E, PRAD1, U21B31
Gene Description	cyclin D1
Omim ID	151400 168461 193300 254500
Gene Ontology	Hyperlink
Gene Summary	The protein encoded by this gene belongs to the highly conserved cyclin family, whose members are characterized by a dramatic periodicity in protein abundance throughout the cell cycle. Cyclins function as regulators of CDK kinases. Different cyclins exhibit distinct expression and degradation patterns which contribute to the temporal coordination of each mitotic event. This cyclin forms a complex with and functions as a regulatory subunit of CDK4 or CDK6, whose activity is required for cell cycle G1/S transition. This protein has been shown to interact with tumor suppressor protein Rb and the expression of this gene is regulated positively by Rb. Mutations, amplification and overexpression of this gene, which alters cell cycle progression, are observed frequently in a variety of tumors and may contribute to tumorigenesis. [provided by RefSeq]
Other Designations	B-cell CLL/lymphoma 1 G1/S-specific cyclin D1
