

FLG monoclonal antibody, clone SPM181

Catalog # MAB14783 Size 100 ug

Applications

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining (Formalin-fixed paraffin-embedded sections) of human skin with FLG monoclonal antibody, clone SPM181 (Cat # MAB14783).

Specification

Product Description	Mouse monoclonal antibody raised against full length recombinant human FLG.
Immunogen	Recombinant protein corresponding to full length human FLG.
Host	Mouse
Theoretical MW (kDa)	26-45, 350
Reactivity	Human
Form	Liquid
Purification	Protein A/G purification
Isotype	IgG1, kappa
Recommend Usage	Flow Cytometry (0.5-1 ug/10 ⁶ cells) Immunofluorescence (1-2 ug/mL) Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) (0.5-1 ug/mL) The optimal working dilution should be determined by the end user.
Storage Buffer	In 10 mM PBS.

Storage Instruction

Store at -20 to -80°C.
Aliquot to avoid repeated freezing and thawing.

Applications

- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining (Formalin-fixed paraffin-embedded sections) of human skin with FLG monoclonal antibody, clone SPM181 (Cat # MAB14783).

- Immunofluorescence
- Flow Cytometry

Gene Info — FLG

Entrez GeneID [2312](#)

Protein Accession# [P20930](#)

Gene Name FLG

Gene Alias ATOD2

Gene Description filaggrin

Omim ID [135940](#) [146700](#) [603165](#)

Gene Ontology [Hyperlink](#)

Gene Summary Profilaggrin is a major protein component of the keratohyalin granules of mammalian epidermis. It is initially expressed as a large polypeptide precursor which is subsequently proteolytically processed into individual functional filaggrin molecules. The filaggrins show wide species variations and their aberrant expression has been implicated in a number of keratinizing disorders (Baden et al., 1974 [PubMed 4132224]; Holbrook et al., 1982 [PubMed 6174530]; Sybert et al., 1985 [PubMed 2579164]).[supplied by OMIM]

Other Designations OTTHUMP00000014057|epidermal filaggrin
