

BCL6 monoclonal antibody, clone BCL6/1475

Catalog # MAB14969 Size 100 ug

Applications

Western Blot

Western Blot analysis of Lane 1: recombinant protein and Lane 2: HepG2 cell lysate with BCL6 monoclonal antibody, clone BCL6/1475 (Cat # MAB14969).

Specification

Product Description Mouse monoclonal antibody raised against partial recombinant human BCL6.

Immunogen Recombinant protein corresponding to amino acids 256-389 of human BCL6.

Host Mouse

Theoretical MW (kDa) 95

Reactivity Human

Form Liquid

Purification Protein A/G purification

Isotype IgG1, kappa

Recommend Usage
 Flow Cytometry (0.5-1 ug/10⁶ cells)
 Immunofluorescence (1-2 ug/mL)
 Western Blotting (0.5-1 ug/mL)
 The optimal working dilution should be determined by the end user.

Storage Buffer In 10 mM PBS.

Storage Instruction

Store at -20 to -80°C.
Aliquot to avoid repeated freezing and thawing.

Applications

- Western Blot

Western Blot analysis of Lane 1: recombinant protein and Lane 2: HepG2 cell lysate with BCL6 monoclonal antibody, clone BCL6/1475 (Cat # MAB14969).

- Immunofluorescence

- Flow Cytometry

Gene Info — BCL6

Entrez GeneID	604
---------------	---------------------

Protein Accession#	P41182
--------------------	------------------------

Gene Name	BCL6
-----------	------

Gene Alias	BCL5, BCL6A, LAZ3, ZBTB27, ZNF51
------------	----------------------------------

Gene Description	B-cell CLL/lymphoma 6
------------------	-----------------------

Omim ID	109565
---------	------------------------

Gene Ontology	Hyperlink
---------------	---------------------------

Gene Summary	The protein encoded by this gene is a zinc finger transcription factor and contains an N-terminal POZ domain. This protein acts as a sequence-specific repressor of transcription, and has been shown to modulate the transcription of START-dependent IL-4 responses of B cells. This protein can interact with a variety of POZ-containing proteins that function as transcription corepressors. This gene is found to be frequently translocated and hypermutated in diffuse large-cell lymphoma (DLCL), and may be involved in the pathogenesis of DLCL. Alternatively spliced transcript variants encoding different protein isoforms have been found for this gene. [provided by RefSeq]
