

SOX11 monoclonal antibody, clone CL0142

Catalog # MAB15540 Size 100 uL

Applications

Western Blot (Transfected lysate)

Western Blot analysis of Lane 1: negative control (vector only transfected HEK293T cell lysate) and Lane 2: over-expression lysate (co-expressed with a C-terminal myc-DDK tag in mammalian HEK293T cells) with SOX11 monoclonal antibody, clone CL0142 (Cat # MAB15540).

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining (Formalin-fixed paraffin-embedded sections) of human mantle cell lymphoma with SOX11 monoclonal antibody, clone CL0142 (Cat # MAB15540) shows moderate to strong nuclear positivity in tumor cells.

Gene Summary

This intronless gene encodes a member of the SOX (SRY-related HMG-box) family of transcription factors involved in the regulation of embryonic development and in the determination of the cell fate. The encoded protein may act as a transcriptional regulator after forming a protein complex with other proteins. The protein may function in the developing nervous system and play a role in tumorigenesis. [provided by RefSeq]
