LAMC1 monoclonal antibody, clone CL3195

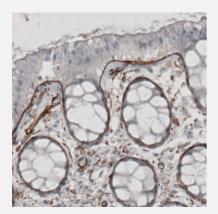

Catalog # MAB15794 Size 100 uL

Applications

Western Blot (Recombinant protein)

Western Blot analysis of recombinant protein Lane 1: Laminin-111, Lane 2: Laminin-121, Lane 3: Laminin-211, Lane 4: Laminin-221, Lane 5: Laminin-411, Lane 6: Laminin-421, Lane 7: Laminin-511, Lane 8: Laminin-521 and Lane 9: Laminin-332 with LAMC1 monoclonal antibody, clone CL3195 (Cat # MAB15794).

Immunohistochemistry (Formalin/PFA-fixed paraffinembedded sections)

Immunohistochemical staining (Formalin-fixed paraffin-embedded sections) of human rectum with LAMC1 monoclonal antibody, clone CL3195 (Cat # MAB15794) shows strong immunoreactivity in basement membrane of glandular epithelium.

| Specification | |
|---------------------|---|
| Product Description | Mouse monoclonal antibody raised against partial recombinant human LAMC1. |
| Immunogen | Recombinant protein corresponding to human LAMC1. |
| Sequence | ECREGFVGNRCDQCEENYFYNRSWPGCQECPACYRLVKDKVADHRVKLQELESLIANLGTGDE MVTDQAFEDRLKEAEREVMDLLREAQDVKDVDQNLMDRLQRVNNTLSSQISRLQNIRNTIEETGN LAEQARAHVENTERLIEIASR |
| Host | Mouse |
| Reactivity | Human |

😵 Abnova

Product Information

| Form | Liquid |
|---------------------|--|
| Purification | Protein A purification |
| lsotype | lgG2b |
| Recommend Usage | Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) (1:500-1:1000) Western Blot (1:500-1:1000) The optimal working dilution should be determined by the end user. |
| Storage Buffer | In PBS, pH 7.2 (40% glycerol, 0.02% sodium azide). |
| Storage Instruction | Store at 4°C. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing. |
| Note | This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only. |

Applications

• Western Blot (Recombinant protein)

Western Blot analysis of recombinant protein Lane 1: Laminin-111, Lane 2: Laminin-121, Lane 3: Laminin-211, Lane 4: Laminin-221, Lane 5: Laminin-411, Lane 6: Laminin-421, Lane 7: Laminin-511, Lane 8: Laminin-521 and Lane 9: Laminin-332 with LAMC1 monoclonal antibody, clone CL3195 (Cat # MAB15794).

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining (Formalin-fixed paraffin-embedded sections) of human rectum with LAMC1 monoclonal antibody, clone CL3195 (Cat # MAB15794) shows strong immunoreactivity in basement membrane of glandular epithelium.

| Gene Info — LAMC1 | |
|--------------------|-----------------------------------|
| Entrez GenelD | <u>3915</u> |
| Protein Accession# | <u>P11047</u> |
| Gene Name | LAMC1 |
| Gene Alias | LAMB2, MGC87297 |
| Gene Description | laminin, gamma 1 (formerly LAMB2) |
| Omim ID | <u>150290 176780</u> |

Gene Summary

Product Information

Laminins, a family of extracellular matrix glycoproteins, are the major noncollagenous constituent of basement membranes. They have been implicated in a wide variety of biological processes inc luding cell adhesion, differentiation, migration, signaling, neurite outgrowth and metastasis. Lamin ins are composed of 3 non identical chains: laminin alpha, beta and gamma (formerly A, B1, and B2, respectively) and they form a cruciform structure consisting of 3 short arms, each formed by a different chain, and a long arm composed of all 3 chains. Each laminin chain is a multidomain prot ein encoded by a distinct gene. Several isoforms of each chain have been described. Different al pha, beta and gamma chain isomers combine to give rise to different heterotrimeric laminin isofor ms which are designated by Arabic numerals in the order of their discovery, i.e. alpha1beta1gam ma1 heterotrimer is laminin 1. The biological functions of the different chains and trimer molecules are largely unknown, but some of the chains have been shown to differ with respect to their tissue distribution, presumably reflecting diverse functions in vivo. This gene encodes the gamma chain i soform laminin, gamma 1. The gamma 1 chain, formerly thought to be a beta chain, contains struc tural domains similar to beta chains, however, lacks the short alpha region separating domains I a nd II. The structural organization of this gene also suggested that it had diverged considerably fro m the beta chain genes. Embryos of transgenic mice in which both alleles of the gamma 1 chain g ene were inactivated by homologous recombination, lacked basement membranes, indicating tha t laminin, gamma 1 chain is necessary for laminin heterotrimer assembly. It has been inferred by a nalogy with the strikingly similar 3' UTR sequence in mouse laminin gamma 1 cDNA, that multiple polyadenylation sites are utilized in human to generate the 2 different sized mRNAs (5.5 and 7.5 k b) seen on Northern analysis. [provided by RefSeq

Other Designations

OTTHUMP00000033450 formerly LAMB2 laminin, gamma 1

Pathway

- ECM-receptor interaction
- Focal adhesion
- Pathways in cancer
- Prion diseases
- Small cell lung cancer

Disease

- Genetic Predisposition to Disease
- Macular Degeneration
- Ovarian Neoplasms
