

PRKCB1 monoclonal antibody, clone N20-N (FITC)

Catalog # MAB15991 Size 1000 uL

Applications

Flow Cytometry

Flow cytometric analysis of human peripheral blood lymphocytes with PRKCB1 monoclonal antibody, clone N20-N (FITC) (Cat # MAB15991).

Specification

Product Description Rabbit monoclonal antibody raised against synthetic peptide of human PRKCB1.

Host Rabbit

Reactivity Human

Form Liquid

Conjugation FITC

Purification EVAC purification

Isotype IgG

Recommend Usage Flow Cytometry
The optimal working dilution should be determined by the end user.

Storage Buffer In PBS (10 mg/mL BSA, 0.05% Sodium Azide).

Storage Instruction Store in the dark at 4°C. Avoid prolonged exposure to light. Do not freeze.

Note

This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Flow Cytometry

Flow cytometric analysis of human peripheral blood lymphocytes with PRKCB1 monoclonal antibody, clone N20-N (FITC) (Cat # MAB15991).

Gene Info — PRKCB

Entrez GeneID [5579](#)

Protein Accession# [P05771](#)

Gene Name PRKCB

Gene Alias MGC41878, PKC-beta, PKCB, PRKCB1, PRKCB2

Gene Description protein kinase C, beta

Omim ID [176970](#)

Gene Ontology [Hyperlink](#)

Gene Summary

Protein kinase C (PKC) is a family of serine- and threonine-specific protein kinases that can be activated by calcium and second messenger diacylglycerol. PKC family members phosphorylate a wide variety of protein targets and are known to be involved in diverse cellular signaling pathways. PKC family members also serve as major receptors for phorbol esters, a class of tumor promoters. Each member of the PKC family has a specific expression profile and is believed to play a distinct role in cells. The protein encoded by this gene is one of the PKC family members. This protein kinase has been reported to be involved in many different cellular functions, such as B cell activation, apoptosis induction, endothelial cell proliferation, and intestinal sugar absorption. Studies in mice also suggest that this kinase may also regulate neuronal functions and correlate fear-induced conflict behavior after stress. Alternatively spliced transcript variants encoding distinct isoforms have been reported. [provided by RefSeq]

Other Designations protein kinase C, beta 1 polypeptide
