

STAT1 (phospho Y701) monoclonal antibody, clone 3E6 (APC)

Catalog # MAB19118 Size 10 Reactions

Applications

Flow Cytometry

Flow cytometric analysis of U937 cells unstained untreated cells as negative control (blue) or stained untreated (red) or treated with IFNα IL4 and pervanadate (green) using STAT1 (phospho Y701) monoclonal antibody (APC).

Specification

Product Description	Rabbit monoclonal antibody raised against synthetic phosphopeptide of human STAT1.
Immunogen	A synthetic phosphopeptide corresponding to residues surrounding Tyr701 of human phospho STAT 1.
Host	Rabbit
Reactivity	Human, Mouse
Form	Liquid
Conjugation	APC
Purification	Protein A/G purification
Isotype	IgG1k
Recommend Usage	Flow Cytometry (5 μ L/ 10^6 cells or 5 μ per 100 μ L) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, pH 7.4 (0.2% BSA, 0.09% sodium azide).

Storage Instruction

Store at 4°C.

Note

This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Flow Cytometry

Flow cytometric analysis of U937 cells unstained untreated cells as negative control (blue) or stained untreated (red) or treated with IFN α IL4 and pervanadate (green) using STAT1 (phospho Y701) monoclonal antibody (APC).

Gene Summary

The protein encoded by this gene is a member of the STAT protein family. In response to cytokines and growth factors, STAT family members are phosphorylated by the receptor associated kinases, and then form homo- or heterodimers that translocate to the cell nucleus where they act as transcription activators. This protein can be activated by various ligands including interferon-alpha, interferon-gamma, EGF, PDGF and IL6. This protein mediates the expression of a variety of genes, which is thought to be important for cell viability in response to different cell stimuli and pathogens. Two alternatively spliced transcript variants encoding distinct isoforms have been described. [provided by RefSeq]
