

# HP monoclonal antibody, clone AACE-8

Catalog # MAB20117      Size 100 uL

## Applications

### Western Blot (Tissue lysate)

Western Blot analysis of human plasma lysate with HP monoclonal antibody, clone AACE-8 (Cat # MAB20117).

## Specification

**Product Description** Rabbit monoclonal antibody raised against synthetic peptide of human HP.

**Immunogen** A synthetic peptide corresponding to human HP.

**Host** Rabbit

**Theoretical MW (kDa)** 45.205

**Reactivity** Human

**Form** Liquid

**Purification** Affinity purification

**Isotype** IgG

**Recommend Usage** Western Blot (1:500-1:2000)  
The optimal working dilution should be determined by the end user.

**Storage Buffer** In PBS, 150 mM NaCl, pH 7.4 (50% glycerol, 0.02% sodium azide).

**Storage Instruction** Store at -20°C for one year. After reconstitution, at 4°C for one month. It can also be aliquotted and stored frozen at -20°C for a longer time. Avoid repeated freezing and thawing.

**Note**

This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

## Applications

- Western Blot (Tissue lysate)

Western Blot analysis of human plasma lysate with HP monoclonal antibody, clone AACE-8 (Cat # MAB20117).

## Gene Info — HP

**Entrez GeneID** [3240](#)

**Protein Accession#** [P00738](#)

**Gene Name** HP

**Gene Alias** BP, HP2-ALPHA-2, HPA1S, MGC111141

**Gene Description** haptoglobin

**Omim ID** [140100](#)

**Gene Ontology** [Hyperlink](#)

**Gene Summary** This gene encodes a preproprotein, which is processed to yield both alpha and beta chains, which subsequently combine as a tetramer to produce haptoglobin. Haptoglobin functions to bind free plasma hemoglobin, which allows degradative enzymes to gain access to the hemoglobin, while at the same time preventing loss of iron through the kidneys and protecting the kidneys from damage by hemoglobin. Mutations in this gene and/or its regulatory regions cause ahaptoglobinemia or hypohaptoglobinemia. This gene has also been linked to diabetic nephropathy, the incidence of coronary artery disease in type 1 diabetes, Crohn's disease, inflammatory disease behavior, primary sclerosing cholangitis, susceptibility to idiopathic Parkinson's disease, and a reduced incidence of Plasmodium falciparum malaria. A similar duplicated gene is located next to this gene on chromosome 16. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq]

**Other Designations** binding peptide|haptoglobin alpha(1S)-beta|haptoglobin alpha(2FS)-beta|haptoglobin, alpha polypeptide|haptoglobin, beta polypeptide
