

HSPB8 monoclonal antibody, clone IOD-8

Catalog # MAB20352 Size 100 uL

Applications

Western Blot (Tissue lysate)

Western Blot analysis of human fetal heart tissue lysate with HSPB8 monoclonal antibody, clone IOD-8 (Cat # MAB20352).

Specification

Product Description Rabbit monoclonal antibody raised against synthetic peptide of human HSPB8.

Immunogen A synthetic peptide corresponding to human HSPB8.

Host Rabbit

Theoretical MW (kDa) 21.604

Reactivity Human

Form Liquid

Purification Affinity purification

Isotype IgG

Recommend Usage

- Immunocytochemistry (1:50-1:100)
- Immunofluorescence (1:50-1:100)
- Immunohistochemistry (1:50-1:100)
- Western Blot (1:500-1:2000)
- The optimal working dilution should be determined by the end user.

Storage Buffer In PBS, 150 mM NaCl, pH 7.4 (50% glycerol, 0.02% sodium azide).

Storage Instruction

Store at -20°C for one year. After reconstitution, at 4°C for one month. It can also be aliquotted and stored frozen at -20°C for a longer time. Avoid repeated freezing and thawing.

Note

This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Western Blot (Tissue lysate)

Western Blot analysis of human fetal heart tissue lysate with HSPB8 monoclonal antibody, clone IOD-8 (Cat # MAB20352).

- Immunohistochemistry

- Immunocytochemistry

- Immunofluorescence

Gene Info — HSPB8

Entrez GeneID[26353](#)**Protein Accession#**[Q9UJY1](#)**Gene Name**

HSPB8

Gene Alias

CMT2L, DHMN2, E2IG1, H11, HMN2, HMN2A, HSP22

Gene Description

heat shock 22kDa protein 8

Omim ID[158590](#) [608014](#) [608673](#)**Gene Ontology**[Hyperlink](#)**Gene Summary**

The protein encoded by this gene belongs to the superfamily of small heat-shock proteins containing a conservative alpha-crystallin domain at the C-terminal part of the molecule. The expression of this gene is induced by estrogen in estrogen receptor-positive breast cancer cells, and this protein also functions as a chaperone in association with Bag3, a stimulator of macroautophagy. Thus, this gene appears to be involved in regulation of cell proliferation, apoptosis, and carcinogenesis, and mutations in this gene have been associated with different neuromuscular diseases, including Charcot-Marie-Tooth disease. [provided by RefSeq]

Other Designations

E2-induced gene 1|heat shock 27kDa protein 8|heat shock protein beta-8|protein kinase H11|small stress protein-like protein HSP22
