

TLR9 monoclonal antibody, clone ABFH-20

Catalog # MAB20792 Size 100 uL

Applications

Western Blot (Cell lysate)

Western Blot analysis of Raji cell lysate with TLR9 monoclonal antibody, clone ABFH-20 (Cat # MAB20792).

Specification

Product Description	Rabbit monoclonal antibody raised against synthetic peptide of human TLR9.
Immunogen	A synthetic peptide corresponding to human TLR9.
Host	Rabbit
Theoretical MW (kDa)	115.86
Reactivity	Human
Form	Liquid
Purification	Affinity purification
Isotype	IgG
Recommend Usage	Western Blot (1:500-1:2000) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, 150 mM NaCl, pH 7.4 (50% glycerol, 0.02% sodium azide).
Storage Instruction	Store at -20°C for one year. After reconstitution, at 4°C for one month. It can also be aliquotted and stored frozen at -20°C for a longer time. Avoid repeated freezing and thawing.

Note

This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Western Blot (Cell lysate)

Western Blot analysis of Raji cell lysate with TLR9 monoclonal antibody, clone ABFH-20 (Cat # MAB20792).

Gene Info — TLR9

Entrez GeneID [54106](#)

Protein Accession# [Q9NR96](#)

Gene Name TLR9

Gene Alias CD289

Gene Description toll-like receptor 9

Omim ID [605474](#)

Gene Ontology [Hyperlink](#)

Gene Summary

The protein encoded by this gene is a member of the Toll-like receptor (TLR) family which plays a fundamental role in pathogen recognition and activation of innate immunity. TLRs are highly conserved from Drosophila to humans and share structural and functional similarities. They recognize pathogen-associated molecular patterns (PAMPs) that are expressed on infectious agents, and mediate the production of cytokines necessary for the development of effective immunity. The various TLRs exhibit different patterns of expression. This gene is preferentially expressed in immune cell rich tissues, such as spleen, lymph node, bone marrow and peripheral blood leukocytes. Studies in mice and human indicate that this receptor mediates cellular response to unmethylated CpG dinucleotides in bacterial DNA to mount an innate immune response. [provided by RefSeq]
