

HLA-DR monoclonal antibody, clone TAL 1B5

Catalog # MAB21230 Size 100 ug

Applications

Western Blot (Cell lysate)

Western Blot Analysis of Ramos cell lysates.

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining (Formalin-fixed paraffin-embedded sections) of human lung cancer with HLA-DR monoclonal antibody, clone TAL 1B5 (Cat # MAB21230).

Flow Cytometry

Flow cytometric analysis of Raji cells with Cat # MAB21230 followed by goat anti-Mouse IgG-CF488 (Blue) and Isotype control (Red).

Specification

Product Description

Mouse monoclonal antibody raised against human HLA-DR.

Immunogen	Monoclonal antibody raised against Bristol 8 cell line of human origin.
Host	Mouse
Reactivity	Human
Form	Liquid
Purification	Protein A/G purification
Isotype	IgG1, kappa
Recommend Usage	Flow Cytometry (1-2 ug/10 ⁶ cells) Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) (1-2 ug/mL) Western Blot (1-2 ug/mL) The optimal working dilution should be determined by the end user.
Storage Buffer	In 10 mM PBS.
Storage Instruction	Store at -20 to -80°C. Aliquot to avoid repeated freezing and thawing.
Note	Molecular Weight of antigen: 36 kDa (alpha chain); 27 kDa (beta chain); 63 kDa (HLA-DR dimer).

Applications

- Western Blot (Cell lysate)

Western Blot Analysis of Ramos cell lysates.

- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining (Formalin-fixed paraffin-embedded sections) of human lung cancer with HLA-DR monoclonal antibody, clone TAL 1B5 (Cat # MAB21230).

- Flow Cytometry

Flow cytometric analysis of Raji cells with Cat # MAB21230 followed by goat anti-Mouse IgG-CF488 (Blue) and Isotype control (Red).

Gene Info — HLA-DRA

Entrez GeneID [3122](#)

Protein Accession# [P01903](#)

Gene Name HLA-DRA

Gene Alias	HLA-DRA1
Gene Description	major histocompatibility complex, class II, DR alpha
Omim ID	142860
Gene Ontology	Hyperlink
Gene Summary	HLA-DRA is one of the HLA class II alpha chain paralogues. This class II molecule is a heterodimer consisting of an alpha and a beta chain, both anchored in the membrane. It plays a central role in the immune system by presenting peptides derived from extracellular proteins. Class II molecules are expressed in antigen presenting cells (APC: B lymphocytes, dendritic cells, macrophages). The alpha chain is approximately 33-35 kDa and its gene contains 5 exons. Exon 1 encodes the leader peptide, exons 2 and 3 encode the two extracellular domains, and exon 4 encodes the transmembrane domain and the cytoplasmic tail. DRA does not have polymorphisms in the peptide binding part and acts as the sole alpha chain for DRB1, DRB3, DRB4 and DRB5. [provided by RefSeq]
Other Designations	HLA class II histocompatibility antigen, DR alpha chain MHC cell surface glycoprotein histocompatibility antigen HLA-DR alpha
