

MMP2 monoclonal antibody, clone ADGF-13

Catalog # MAB22013 Size 100 uL

Applications

Western Blot (Cell lysate)

Western Blot (cell lysate) analysis of L6 cell lysate.

Specification

Product Description Rabbit monoclonal antibody raised against synthetic protein of human MMP2.

Immunogen A synthetic peptide corresponding to human MMP2.

Host Rabbit

Reactivity Human, Mouse, Rat

Form Liquid

Purification Affinity purification

Isotype IgG

Recommend Usage
 Immunocytochemistry (1:50-200)
 Immunofluorescence (1:50-200)
 Western Blot (1:500-2000)
 The optimal working dilution should be determined by the end user.

Storage Buffer In PBS, 150 mM NaCl, pH 7.4 (50% glycerol, 0.02% sodium azide).

Storage Instruction

Store at -20°C is stable for one year. It can also be aliquotted and stored frozen at -20°C for a longer time.
Aliquot to avoid repeated freezing and thawing.

Note

This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Western Blot (Cell lysate)

Western Blot (cell lysate) analysis of L6 cell lysate.

- Immunocytochemistry

- Immunofluorescence

Gene Info — MMP2

Entrez GeneID[4313](#)**Protein Accession#**[P08253](#)**Gene Name**

MMP2

Gene Alias

CLG4, CLG4A, MMP-II, MONA, TBE-1

Gene Description

matrix metalloproteinase 2 (gelatinase A, 72kDa gelatinase, 72kDa type IV collagenase)

Omim ID[120360](#) [277950](#) [605156](#)**Gene Ontology**[Hyperlink](#)**Gene Summary**

Proteins of the matrix metalloproteinase (MMP) family are involved in the breakdown of extracellular matrix in normal physiological processes, such as embryonic development, reproduction, and tissue remodeling, as well as in disease processes, such as arthritis and metastasis. Most MMP's are secreted as inactive proproteins which are activated when cleaved by extracellular proteinases. This gene encodes an enzyme which degrades type IV collagen, the major structural component of basement membranes. The enzyme plays a role in endometrial menstrual breakdown, regulation of vascularization and the inflammatory response. Mutations in this gene have been associated with Winchester syndrome and Nodulosis-Arthropathy-Osteolysis (NAO) syndrome. Two transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq]

Other Designations

collagenase type IV-A|matrix metalloproteinase 2|matrix metalloproteinase-III|neutrophil gelatinase
