

EP300 monoclonal antibody, clone RW128

Catalog # MAB2384

Size 100 ug

Applications

Western Blot (Cell lysate)

Western blot analysis of EP300 in a HeLa nuclear extract using EP300 monoclonal antibody, clone RW128 (Cat # MAB2384) (1 : 250). ECL : 15 second exposure.

Specification

Product Description	Mouse monoclonal antibody raised against partial recombinant EP300.
Immunogen	Recombinant protein corresponding to amino acids 1572-2371 of human EP300.
Host	Mouse
Reactivity	Human, Mouse, Primates, Rat
Specificity	This antibody is specific to p300 protein. This antibody recognizes residues 1868-1921.
Form	Liquid
Isotype	IgG1, kappa
Recommend Usage	Western Blot (1:250-1:500) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, pH 7.4 (0.09% sodium azide)
Storage Instruction	Store at -20°C or -80°C. Aliquot to avoid repeated freezing and thawing.

Note

This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Western Blot (Cell lysate)

Western blot analysis of EP300 in a HeLa nuclear extract using EP300 monoclonal antibody, clone RW128 (Cat # MAB2384) (1 : 250). ECL : 15 second exposure.

- Immunofluorescence

- Immunoprecipitation

Gene Info — EP300

Entrez GeneID	2033
---------------	----------------------

Gene Name	EP300
-----------	-------

Gene Alias	KAT3B, p300
------------	-------------

Gene Description	E1A binding protein p300
------------------	--------------------------

Omim ID	114500 180849 602700
---------	--

Gene Ontology	Hyperlink
---------------	---------------------------

Gene Summary	This gene encodes the adenovirus E1A-associated cellular p300 transcriptional co-activator protein. It functions as histone acetyltransferase that regulates transcription via chromatin remodeling and is important in the processes of cell proliferation and differentiation. It mediates cAMP-gene regulation by binding specifically to phosphorylated CREB protein. This gene has also been identified as a co-activator of HIF1A (hypoxia-inducible factor 1 alpha), and thus plays a role in the stimulation of hypoxia-induced genes such as VEGF. Defects in this gene are a cause of Rubinstein-Taybi syndrome and may also play a role in epithelial cancer. [provided by RefSeq]
