

INS monoclonal antibody, clone 2/5E4

Catalog # MAB3684

Size 1 mg

Specification

Product Description	Mouse monoclonal antibody raised against recombinant INS.
Immunogen	Recombinant protein corresponding to human INS.
Host	Mouse
Reactivity	Human
Specificity	This antibody recognizes natural insulin.
Form	Liquid
Isotype	IgG1, kappa
Recommend Usage	The optimal working dilution should be determined by the end user.
Storage Buffer	In BBS
Storage Instruction	Store at 4°C.

Applications

- Enzyme-linked Immunoabsorbent Assay

Gene Info — INS

Entrez GeneID	3630
Gene Name	INS
Gene Alias	ILPR, IRDN
Gene Description	insulin

Omim ID	125850 176730
Gene Ontology	Hyperlink
Gene Summary	After removal of the precursor signal peptide, proinsulin is post-translationally cleaved into two chains (peptide A and peptide B) that are covalently linked via two disulfide bonds. Binding of this mature form of insulin to the insulin receptor (INSR) stimulates glucose uptake. A variety of mutant alleles with changes in the coding region have been identified. There is a read-through gene, INS-IGF2, which overlaps with this gene at the 5' region and with the IGF2 gene at the 3' region. [provided by RefSeq]
Other Designations	OTTHUMP00000011161 OTTHUMP00000011162 OTTHUMP00000196038 proinsulin
