

MMP9 monoclonal antibody, clone SB15c (HRP)

Catalog # MAB5895

Size

Applications

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Paraffin embedded sections of human colon were stained with MMP9 monoclonal antibody, clone SB15c. Goat Anti-Mouse IgG2a, human ads-BIOT and Streptavidin-HRP were used and then developed with DAB.

Specification

Product Description	Mouse monoclonal antibody raised against recombinant MMP9.
Immunogen	Recombinant protein corresponding to human MMP9.
Host	Mouse
Reactivity	Human
Specificity	human MMP-9; Does not cross react to human MMP-1, MMP-2 or MMP-3.
Form	Liquid
Conjugation	HRP
Isotype	IgG2a
Recommend Usage	ELISA (1:1000-1:4000) Immunohistochemistry (1:1000-1:2000) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, pH 7.4 (50% glycerol)

Storage Instruction

Store at 4°C. For long term storage store at -20°C.
Aliquot to avoid repeated freezing and thawing.

Applications

- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Paraffin embedded sections of human colon were stained with MMP9 monoclonal antibody, clone SB15c. Goat Anti-Mouse IgG2a, human ads-BIOT and Streptavidin-HRP were used and then developed with DAB.

- Immunohistochemistry (Frozen sections)
- Enzyme-linked Immunoabsorbent Assay

Gene Info — MMP9

Entrez GeneID [4318](#)

Gene Name MMP9

Gene Alias CLG4B, GELB, MMP-9

Gene Description matrix metalloproteinase 9 (gelatinase B, 92kDa gelatinase, 92kDa type IV collagenase)

Omim ID [120361](#)

Gene Ontology [Hyperlink](#)

Gene Summary Proteins of the matrix metalloproteinase (MMP) family are involved in the breakdown of extracellular matrix in normal physiological processes, such as embryonic development, reproduction, and tissue remodeling, as well as in disease processes, such as arthritis and metastasis. Most MMP's are secreted as inactive proproteins which are activated when cleaved by extracellular proteinases. The enzyme encoded by this gene degrades type IV and V collagens. Studies in rhesus monkeys suggest that the enzyme is involved in IL-8-induced mobilization of hematopoietic progenitor cells from bone marrow, and murine studies suggest a role in tumor-associated tissue remodeling. [provided by RefSeq]
