

CCL2 monoclonal antibody, clone 687ju

Catalog # MAB8838

Size 100 uL

Applications

Western Blot (Recombinant protein)

Western blot analysis in CCL2 recombinant protein with CCL2 monoclonal antibody, clone 687ju (Cat # MAB8838) at 1 : 1000 dilution.

Specification

Product Description Mouse monoclonal antibody raised against full length recombinant CCL2.

Amount 100 uL

Immunogen Recombinant protein corresponding to full length human CCL2.

Host Mouse

Reactivity Human

Specificity This antibody recognizes recombinant protein CCL2.

Form Liquid

Purification Affinity purification

Concentration 1 ug/uL

Isotype IgG1

Recommend Usage Western Blot (1:1000)
The optimal working dilution should be determined by the end user.

Storage Buffer In citrate-Tris-HCl, pH7.0 (0.02% Proclin 300)

Storage Instruction Store at -20°C.
Aliquot to avoid repeated freezing and thawing.

Applications

- Western Blot (Recombinant protein)

Western blot analysis in CCL2 recombinant protein with CCL2 monoclonal antibody, clone 687ju (Cat # MAB8838) at 1 : 1000 dilution.

- Enzyme-linked Immunoabsorbent Assay

Gene Info — CCL2

Entrez GeneID [6347](#)

Protein Accession# [NM_002982.3](#)

Gene Name CCL2

Gene Alias GDCF-2, HC11, HSMCR30, MCAF, MCP-1, MCP1, MGC9434, SCYA2, SMC-CF

Gene Description chemokine (C-C motif) ligand 2

Omim ID [158105](#) [182940](#) [607948](#) [609423](#)

Gene Ontology [Hyperlink](#)

Gene Summary This gene is one of several cytokine genes clustered on the q-arm of chromosome 17. Cytokines are a family of secreted proteins involved in immunoregulatory and inflammatory processes. The protein encoded by this gene is structurally related to the CXC subfamily of cytokines. Members of this subfamily are characterized by two cysteines separated by a single amino acid. This cytokine displays chemotactic activity for monocytes and basophils but not for neutrophils or eosinophils. It has been implicated in the pathogenesis of diseases characterized by monocytic infiltrates, like psoriasis, rheumatoid arthritis and atherosclerosis. It binds to chemokine receptors CCR2 and CCR4. [provided by RefSeq]

Other Designations monocyte chemoattractant protein-1|monocyte chemotactic and activating factor|monocyte chemotactic protein 1, homologous to mouse Sig-jel|monocyte secretory protein JE|small inducible cytokine A2|small inducible cytokine A2 (monocyte chemotactic protein 1,
