

CCL2 monoclonal antibody, clone 6h75

Catalog # MAB8839

Size 100 uL

Applications

Western Blot (Recombinant protein)

Western blot analysis in CCL2 recombinant protein with CCL2 monoclonal antibody, clone 6h75 (Cat # MAB8839) at 1 : 1000 dilution.

Specification

Product Description	Mouse monoclonal antibody raised against full length recombinant CCL2.
Amount	100 uL
Immunogen	Recombinant protein corresponding to full length human CCL2.
Host	Mouse
Reactivity	Human
Specificity	This antibody recognizes recombinant protein CCL2.
Form	Liquid
Purification	Affinity purification
Concentration	1 ug/uL
Isotype	IgG1
Recommend Usage	Western Blot (1:1000) The optimal working dilution should be determined by the end user.

Storage Buffer	In citrate-Tris-HCl, pH7.0 (0.02% Proclin 300)
----------------	--

Storage Instruction	Store at -20°C. Aliquot to avoid repeated freezing and thawing.
---------------------	--

Applications

- Western Blot (Recombinant protein)

Western blot analysis in CCL2 recombinant protein with CCL2 monoclonal antibody, clone 6h75 (Cat # MAB8839) at 1 : 1000 dilution.

- Enzyme-linked Immunoabsorbent Assay

Gene Info — CCL2

Entrez GeneID	6347
---------------	----------------------

Protein Accession#	NM_002982.3
--------------------	-----------------------------

Gene Name	CCL2
-----------	------

Gene Alias	GDCF-2, HC11, HSMCR30, MCAF, MCP-1, MCP1, MGC9434, SCYA2, SMC-CF
------------	--

Gene Description	chemokine (C-C motif) ligand 2
------------------	--------------------------------

Omim ID	158105 182940 607948 609423
---------	---

Gene Ontology	Hyperlink
---------------	---------------------------

Gene Summary	This gene is one of several cytokine genes clustered on the q-arm of chromosome 17. Cytokines are a family of secreted proteins involved in immunoregulatory and inflammatory processes. The protein encoded by this gene is structurally related to the CXC subfamily of cytokines. Members of this subfamily are characterized by two cysteines separated by a single amino acid. This cytokine displays chemotactic activity for monocytes and basophils but not for neutrophils or eosinophils. It has been implicated in the pathogenesis of diseases characterized by monocytic infiltrates, like psoriasis, rheumatoid arthritis and atherosclerosis. It binds to chemokine receptors CCR2 and CCR4. [provided by RefSeq]
--------------	---

Other Designations	monocyte chemoattractant protein-1 monocyte chemotactic and activating factor monocyte chemotactic protein 1, homologous to mouse Sig-jel monocyte secretory protein JE small inducible cytokine A2 small inducible cytokine A2 (monocyte chemotactic protein 1,
