

# Histone

Catalog # P5231

Size 250 mg

## Specification

<b>Product Description</b>	Lyophilized. Dialyzed. Unfractionated mixture of histones.
<b>Biological function</b>	The histones are a group of water- and dilute acid-soluble basic proteins found associated with DNA in chromosomes. They are characterized by relatively high levels of lysine and arginine.
<b>Host</b>	Bovine
<b>Form</b>	Lyophilized
<b>Preparation Method</b>	Native protein purified from Calf Thymus
<b>Storage Instruction</b>	Store at 4°C.
<b>Note</b>	Histones are characterized by gel electrophoresis and solubility. Soluble in physiological saline, phosphate buffered saline (PBS) pH 7.1, or water when pH is adjusted to neutral.

## Applications

- SDS-PAGE
