

Bioactive

# Deoxyribonuclease I

Catalog # P5307      Size 25000 Units

## Specification

<b>Product Description</b>	Lyophilized. Contains ? 0.0005% RNase.
<b>Biological function</b>	Bovine pancreatic deoxyribonuclease is an endonuclease which splits phosphodiester linkages, preferentially adjacent to a pyrimidine nucleotide yielding polynucleotides with free hydroxyl group at the 3' position and phosphate group at the 5' position.
<b>Host</b>	Bovine
<b>Theoretical MW (kDa)</b>	31.3
<b>Form</b>	Lyophilized
<b>Preparation Method</b>	Native protein chromatographically purified from Bovine Pancreas
<b>Activity</b>	>=2,000 Kunitz units per mg dry weight. One Unit causes an increase in absorbance at 260 nm of 0.001 per minute per ml at 25°C when acting upon highly polymerized DNA at pH 5.0.
<b>Recommend Usage</b>	Deoxyribonuclease I Assay; Nick translation; DNA mapping; Isolation of nuclear RNA and protein; Plasmid construction; RNA polymerase synthesis of RNA probes and RT-PCR.
<b>Storage Instruction</b>	Store at 4°C on dry atmosphere.
<b>Note</b>	Contains glycine as a stabilizer. All equipment used to handle product should be RNase-free. Glassware and spatulas need to be heat-treated.

## Applications

- Enzyme Activity

## Gene Info — DNASE1
