

Bioactive

CCL2 (Human) Recombinant Protein

Catalog # P7491 Size 5 ug

Specification

Product Description	Human CCL2 (P13500, 24 a.a. - 99 a.a.) partial recombinant protein expressed in <i>Escherichia coli</i> .
Sequence	QPDAINAPVTCCYNFTNRKISVQRLASYRRITSSKCPKEAVIFKTIVAKEICADPKQKWWQDSMDHL DKQTQTPKT
Host	<i>Escherichia coli</i>
Theoretical MW (kDa)	~ 8.7
Form	Lyophilized
Preparation Method	<i>Escherichia coli</i> expression system
Purity	> 95% as analyzed by SDS-PAGE.
Endotoxin Level	< 0.5 EU/ ug of protein (gel clotting method)
Activity	EC ₅₀ of human MCP-1/CCL2 < 1.0 ug/mL, measured by Ca ²⁺ mobilization assay in CHO-K1/Galph a15/hCCR2 cells (human Galpha15 and human CCR2 stably expressed in CHO-K1 cells).
Recommend Usage	Biological Activity SDS-PAGE The optimal working dilution should be determined by the end user.
Storage Buffer	Lyophilized from PBS. Reconstitute the lyophilized powder in ddH ₂ O or PBS up to 100 ug/mL.
Storage Instruction	Store at 4°C for 1 week. For long term storage store at -20°C to -83°C. Aliquot to avoid repeated freezing and thawing.

Applications

- Functional Study
- SDS-PAGE

Gene Info — CCL2

Entrez GeneID	6347
Protein Accession#	P13500
Gene Name	CCL2
Gene Alias	GDCF-2, HC11, HSMCR30, MCAF, MCP-1, MCP1, MGC9434, SCYA2, SMC-CF
Gene Description	chemokine (C-C motif) ligand 2
Omim ID	158105 182940 607948 609423
Gene Ontology	Hyperlink
Gene Summary	This gene is one of several cytokine genes clustered on the q-arm of chromosome 17. Cytokines are a family of secreted proteins involved in immunoregulatory and inflammatory processes. The protein encoded by this gene is structurally related to the CXC subfamily of cytokines. Members of this subfamily are characterized by two cysteines separated by a single amino acid. This cytokine displays chemotactic activity for monocytes and basophils but not for neutrophils or eosinophils. It has been implicated in the pathogenesis of diseases characterized by monocytic infiltrates, like psoriasis, rheumatoid arthritis and atherosclerosis. It binds to chemokine receptors CCR2 and CCR4. [provided by RefSeq]
Other Designations	monocyte chemoattractant protein-1 monocyte chemotactic and activating factor monocyte chemotactic protein 1, homologous to mouse Sig-jel monocyte secretory protein JE small inducible cytokine A2 small inducible cytokine A2 (monocyte chemotactic protein 1,
