HuPro®

# IL12 (Human) Recombinant Protein

Catalog # P8326      Size 2 x 10 ug

## Specification

<b>Product Description</b>	Human IL12 (P29459, 23 a.a. - 219 a.a., P29460, 23 a.a. - 328 a.a.) partial recombinant protein expressed in HEK293 cells.
<b>Sequence</b>	RNLPVATPDPMFPCLHHSQNLRAVSNMLQKARQTLEFYPCTSEEIDHEDITDKTSTVEACLP LELTKNESCLNSRETSFITNGSCLASRKTSFMMALCLSSIYEDLKMYQVEFKTMNAKLLMDPKRQI FLDQNMLAVIDELMQALNFNSETVPQKSSLEEPDFYTKIKLCILLHAFRIRAVTIDRVMSYLNASIM ELKKDVYVVELDWYPDAPGEMVVLTCDTPEEDGITWTLQDQSSEVLGSGKTLTIQVKEFGDAGQY TCHKGGEVLSHSLLLHKKEDGWSTDILKDQKEPKNKTFLRCEAKNYSGRFTCWLTISTDLTF SVKSSRGSSDPQGVTCGAATLSAERVRGDNKEYEYSVECQEDSACPAAEESLPIEVMVDAVHK LKYENYTSSFFIRDIIKPDPPLQLKPLKNSRQVEVSWEYPDTWSTPHSYFSLTFCVQVQGKSKR EKKDRVFTDKTSATVICRKNASISVRAQDRYSSSWSEWASVPCS
<b>Host</b>	Mammals
<b>Theoretical MW (kDa)</b>	57
<b>Form</b>	Lyophilized
<b>Preparation Method</b>	Mammalian cell (HEK293) expression system
<b>Purity</b>	> 95% by SDS-PAGE
<b>Activity</b>	The EC <sub>50</sub> is 0.5ng/mL was determined by the dose-dependent release of IFN-gamma from the human NK92 cell line in presence of 20 ng/mL rIL-2.
<b>Recommend Usage</b>	Biological Activity SDS-PAGE The optimal working dilution should be determined by the end user.
<b>Storage Buffer</b>	In PBS (0.1% endotoxin-free recombinant HAS)
<b>Storage Instruction</b>	Store at 2°C to 8°C for 1 week. For long term storage, aliquot and store at -20°C to -80°C. Aliquot to avoid repeated freezing and thawing.

## Applications

- Functional Study
- SDS-PAGE

## Gene Info — IL12A

Entrez GeneID	<a href="#">3592</a>
Protein Accession#	<a href="#">P29459 P29460</a>
Gene Name	IL12A
Gene Alias	CLMF, IL-12A, NFSK, NKSF1, P35
Gene Description	interleukin 12A (natural killer cell stimulatory factor 1, cytotoxic lymphocyte maturation factor 1, p35)
Omim ID	<a href="#">161560</a>
Gene Ontology	<a href="#">Hyperlink</a>
Gene Summary	This gene encodes a subunit of a cytokine that acts on T and natural killer cells, and has a broad array of biological activities. The cytokine is a disulfide-linked heterodimer composed of the 35-kD subunit encoded by this gene, and a 40-kD subunit that is a member of the cytokine receptor family. This cytokine is required for the T-cell-independent induction of interferon (IFN)-gamma, and is important for the differentiation of both Th1 and Th2 cells. The responses of lymphocytes to this cytokine are mediated by the activator of transcription protein STAT4. Nitric oxide synthase 2A (NO S2A/NOS2) is found to be required for the signaling process of this cytokine in innate immunity. [provided by RefSeq]
Other Designations	IL-12, subunit p35 NF cell stimulatory factor chain 1 cytotoxic lymphocyte maturation factor 1, p35 interleukin 12, p35 interleukin 12A interleukin-12 alpha chain natural killer cell stimulatory factor 1, 35 kD subunit

## Gene Info — IL12B

Entrez GeneID	<a href="#">3593</a>
Protein Accession#	<a href="#">P29459 P29460</a>
Gene Name	IL12B
Gene Alias	CLMF, CLMF2, IL-12B, NKSF, NKSF2

Gene Description	interleukin 12B (natural killer cell stimulatory factor 2, cytotoxic lymphocyte maturation factor 2, p40)
Omim ID	<a href="#">161561 177900 209950 600807</a>
Gene Ontology	<a href="#">Hyperlink</a>
Gene Summary	This gene encodes a subunit of interleukin 12, a cytokine that acts on T and natural killer cells, and has a broad array of biological activities. Interleukin 12 is a disulfide-linked heterodimer composed of the 40 kD cytokine receptor like subunit encoded by this gene, and a 35 kD subunit encoded by IL12A. This cytokine is expressed by activated macrophages that serve as an essential inducer of Th1 cells development. This cytokine has been found to be important for sustaining a sufficient number of memory/effect Th1 cells to mediate long-term protection to an intracellular pathogen. Overexpression of this gene was observed in the central nervous system of patients with multiple sclerosis (MS), suggesting a role of this cytokine in the pathogenesis of the disease. The promoter polymorphism of this gene has been reported to be associated with the severity of atopic and non-atopic asthma in children. [provided by RefSeq]
Other Designations	IL12, subunit p40 OTTHUMP00000160820 cytotoxic lymphocyte maturation factor 2, p40 interleukin 12, p40 interleukin 12B interleukin-12 beta chain natural killer cell stimulatory factor, 40 kD subunit natural killer cell stimulatory factor-2
