

## NTSR2 polyclonal antibody

Catalog # PAB0151

Size 100 ug

### Specification

|                            |                                                                                                                        |
|----------------------------|------------------------------------------------------------------------------------------------------------------------|
| <b>Product Description</b> | Rabbit polyclonal antibody raised against partial recombinant NTSR2.                                                   |
| <b>Immunogen</b>           | Recombinant protein corresponding to amino acids 150-200 of human NTSR2.                                               |
| <b>Host</b>                | Rabbit                                                                                                                 |
| <b>Reactivity</b>          | Human, Mouse                                                                                                           |
| <b>Form</b>                | Liquid                                                                                                                 |
| <b>Recommend Usage</b>     | The optimal working dilution should be determined by the end user.                                                     |
| <b>Storage Buffer</b>      | In PBS (0.05% BSA, 0.05% sodium azide)                                                                                 |
| <b>Storage Instruction</b> | Store at 4°C. For long term storage store at -20°C.<br>Aliquot to avoid repeated freezing and thawing.                 |
| <b>Note</b>                | This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |

### Applications

- Western Blot
- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

### Gene Info — NTSR2

| Gene Summary       | <p>The protein encoded by this gene belongs to the G protein-coupled receptor family that activate a phosphatidylinositol-calcium second messenger system. Binding and pharmacological studies demonstrate that this receptor binds neurotensin as well as several other ligands already described for neurotensin NT1 receptor. However, unlike NT1 receptor, this gene recognizes, with high affinity, levocabastine, a histamine H1 receptor antagonist previously shown to compete with neurotensin for low-affinity binding sites in brain. These activities suggest that this receptor may be of physiological importance and that a natural agonist for the receptor may exist. [provided by RefSeq]</p> |
| Other Designations | levocabastine-sensitive neurotensin receptor neurotensin receptor, type 2                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
