

CD40 polyclonal antibody

Catalog # PAB0251 Size 50 uL

Applications

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Formalin-fixed paraffin-embedded tissue section of human tonsil stained for CD40 expression. Using CD40 polyclonal antibody (Cat # PAB0251) at 1 : 2000. Staining is seen in the dendritic cells. Hematoxylin-eosin counterstain.

Specification

Product Description	Rabbit polyclonal antibody raised against a recombinant CD40.
Immunogen	Recombinant protein corresponding to short cytoplasmic region of the human CD40.
Host	Rabbit
Reactivity	Dog, Gerbils, Human, Mouse, Rat
Form	Liquid
Recommend Usage	The optimal working dilution should be determined by the end user.
Storage Buffer	In serum (0.05% sodium azide)
Storage Instruction	Store at -20°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Formalin-fixed paraffin-embedded tissue section of human tonsil stained for CD40 expression. Using CD40 polyclonal antibody (Cat # PAB0251) at 1 : 2000. Staining is seen in the dendritic cells. Hematoxylin-eosin counterstain.

- Immunohistochemistry (Frozen sections)
- Immunoprecipitation

Gene Info — CD40

Entrez GeneID [958](#)

Gene Name CD40

Gene Alias Bp50, CDW40, MGC9013, TNFRSF5, p50

Gene Description CD40 molecule, TNF receptor superfamily member 5

Omim ID [109535 606843](#)

Gene Ontology [Hyperlink](#)

Gene Summary

The protein encoded by this gene is a member of the TNF-receptor superfamily. This receptor has been found to be essential in mediating a broad variety of immune and inflammatory responses including T cell-dependent immunoglobulin class switching, memory B cell development, and germinal center formation. AT-hook transcription factor AKNA is reported to coordinately regulate the expression of this receptor and its ligand, which may be important for homotypic cell interactions. Adaptor protein TNFR2 interacts with this receptor and serves as a mediator of the signal transduction. The interaction of this receptor and its ligand is found to be necessary for amyloid-beta-induced microglial activation, and thus is thought to be an early event in Alzheimer disease pathogenesis. Two alternatively spliced transcript variants of this gene encoding distinct isoforms have been reported. [provided by RefSeq]
