

SMAD3 polyclonal antibody

Catalog # PAB11264 Size 100 ug

Applications

Western Blot (Transfected lysate)

Western blot using SMAD3 polyclonal antibody (Cat # PAB11264) to detect over-expressed SMAD3 in MDA-MB-231 cells (lane 2). Lane 1 shows mock infection of MDA-MB-231 cells with lentiviral vector alone. The primary antibody at a 1:5,000 dilution. Personal Communication, Allan Weissman, CCR-NCI, Bethesda, MD.

Specification

Product Description	Rabbit polyclonal antibody raised against synthetic peptide of SMAD3.
Immunogen	A synthetic peptide corresponding to internal region of human SMAD3.
Host	Rabbit
Reactivity	Human, Mouse, Rat
Specificity	This antibody is Smad3 specific, and reactivity to other Smad proteins (specifically Smad1, Smad2, Smad4, and Smad7) is not detected in over-expressed cell lysates.
Form	Liquid
Quality Control Testing	Antibody Reactive Against Synthetic Peptide.
Recommend Usage	ELISA (1:15000-1:50000) Western Blot (1:500-1:10000) The optimal working dilution should be determined by the end user.

Gene Description

SMAD family member 3

Omim ID[603109](#)**Gene Ontology**[Hyperlink](#)**Gene Summary**

The protein encoded by this gene belongs to the SMAD, a family of proteins similar to the gene products of the Drosophila gene 'mothers against decapentaplegic' (Mad) and the C. elegans gene Sma. SMAD proteins are signal transducers and transcriptional modulators that mediate multiple signaling pathways. This protein functions as a transcriptional modulator activated by transforming growth factor-beta and is thought to play a role in the regulation of carcinogenesis. [provided by RefSeq]
