# ALDOA polyclonal antibody

Catalog # PAB11351 Size 100 ug

## Applications

#### Western Blot (Cell lysate)

IgG purified ALDOA polyclonal antibody (Cat # PAB11351) to rabbit muscle aldolase was used at a 1:1000 dilution to detect human aldolase by Western blot.

A whole cell lysate prepared from human derived A293 cells was loaded on a 4-12% tris glycine gradient gel for SDS-PAGE.

The gel was transferred to nitrocellulose using standard techniques. Antibody reaction with the membrane occurred overnight at 4°C in TTBS supplemented with 2% non-fat dry milk.

Color was allowed to develop using Super Signal West Pico Chemiluminescent Substrate (PIERCE).

This antibody clearly detects a band at ~41 KDa consistent with human aldolase.

Specification	
Product Description	Goat polyclonal antibody raised against native ALDOA.
Immunogen	Native purified ALDOA from rabbit muscle.
Host	Goat
Reactivity	Rabbit
Form	Lyophilized
Quality Control Testing	Antibody Reactive Against Native Purified Protein.
Recommend Usage	Sandwich ELISA (1:10000-1:40000) Immunoprecipitation (5 ul) The optimal working dilution should be determined by the end user.

# 😵 Abnova

### **Product Information**

Storage Buffer	In 20 mM potassium phosphate buffer, 150 mM NaCl, pH 7.2 (0.01% sodium azide)
Storage Instruction	Store at 4°C on dry atmosphere. After reconstitution with deionized water, store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

## Applications

• Western Blot (Cell lysate)

IgG purified ALDOA polyclonal antibody (Cat # PAB11351) to rabbit muscle aldolase was used at a 1:1000 dilution to detect human aldolase by Western blot.

A whole cell lysate prepared from human derived A293 cells was loaded on a 4-12% tris glycine gradient gel for SDS-PAGE. The gel was transferred to nitrocellulose using standard techniques. Antibody reaction with the membrane occurred overnight at 4°C in TTBS supplemented with 2% non-fat dry milk.

Color was allowed to develop using Super Signal West Pico Chemiluminescent Substrate (PIERCE).

This antibody clearly detects a band at ~41 KDa consistent with human aldolase.
