

GRIK1 polyclonal antibody

Catalog # PAB13311 Size 100 ug

Applications

Western Blot (Cell lysate)

Western blot analysis of GRIK1 in P815 cell lysate with GRIK1 polyclonal antibody (Cat # PAB13311) at (A) 0.5, (B) 1 and (C) 2 ug/mL .

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining of human brain tissue using GRIK1 polyclonal antibody (Cat # PAB13311) at 2.5 ug/mL .

Specification

Product Description	Rabbit polyclonal antibody raised against synthetic peptide of GRIK1.
Immunogen	A synthetic peptide corresponding to C-terminus 15 amino acids of human GRIK1.
Host	Rabbit
Reactivity	Human, Mouse
Form	Liquid
Recommend Usage	Western Blot (0.5-1 ug/mL) The optimal working dilution should be determined by the end user.

Storage Buffer	In PBS (0.02% sodium azide)
Storage Instruction	Store at 4°C for three months. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Western Blot (Cell lysate)

Western blot analysis of GRIK1 in P815 cell lysate with GRIK1 polyclonal antibody (Cat # PAB13311) at (A) 0.5, (B) 1 and (C) 2 ug/mL .

- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining of human brain tissue using GRIK1 polyclonal antibody (Cat # PAB13311) at 2.5 ug/mL .

Gene Info — GRIK1

Entrez GeneID	2897
Protein Accession#	P39086
Gene Name	GRIK1
Gene Alias	EAA3, EEA3, GLR5, GLUR5
Gene Description	glutamate receptor, ionotropic, kainate 1
Omim ID	138245
Gene Ontology	Hyperlink
Gene Summary	Glutamate receptors are the predominant excitatory neurotransmitter receptors in the mammalian brain and are activated in a variety of normal neurophysiologic processes. This gene product belongs to the kainate family of glutamate receptors, which are composed of four subunits and function as ligand-activated ion channels. The subunit encoded by this gene is subject to RNA editing (CAG->CGG; Q->R) within the second transmembrane domain, which is thought to alter the properties of ion flow. Alternative splicing, resulting in transcript variants encoding different isoforms, has been noted for this gene. [provided by RefSeq]
Other Designations	OTTHUMP00000096569 excitatory amino acid receptor 3 glutamate receptor 5
