

APOB polyclonal antibody

Catalog # PAB14895 Size

Specification

Product Description	Goat polyclonal antibody raised against native APOB.
Immunogen	Native purified APOB (lipid free) solubilised in SDS from human donor plasma pool.
Host	Goat
Reactivity	Human
Form	Liquid
Recommend Usage	The optimal working dilution should be determined by the end user.
Storage Buffer	In serum
Storage Instruction	Store at -20°C. Aliquot to avoid repeated freezing and thawing.

Applications

- Western Blot
- Immunoprecipitation
- Enzyme-linked Immunoabsorbent Assay

Gene Info — APOB

Entrez GeneID	338
Gene Name	APOB
Gene Alias	FLDB

Gene Description	apolipoprotein B (including Ag(x) antigen)
Omim ID	107730 144010
Gene Ontology	Hyperlink
Gene Summary	This gene product is the main apolipoprotein of chylomicrons and low density lipoproteins. It occurs in plasma as two main isoforms, apoB-48 and apoB-100: the former is synthesized exclusively in the gut and the latter in the liver. The intestinal and the hepatic forms of apoB are encoded by a single gene from a single, very long mRNA. The two isoforms share a common N-terminal sequence. The shorter apoB-48 protein is produced after RNA editing of the apoB-100 transcript at residue 2180 (CAA->UAA), resulting in the creation of a stop codon, and early translation termination. Mutations in this gene or its regulatory region cause hypobetalipoproteinemia, normotriglyceridemic hypobetalipoproteinemia, and hypercholesterolemia due to ligand-defective apoB, diseases affecting plasma cholesterol and apoB levels. [provided by RefSeq]
Other Designations	OTTHUMP00000115994 apoB-100 apoB-48 apolipoprotein B apolipoprotein B48
