

IL6R polyclonal antibody

Catalog # PAB16184 Size 100 ug

Specification

Product Description	Rabbit polyclonal antibody raised against partial recombinant IL6R.
Immunogen	Recombinant protein corresponding to extracellular region of human IL6R.
Host	Rabbit
Reactivity	Human
Form	Lyophilized
Purification	Protein A affinity chromatography
Isotype	IgG
Recommend Usage	ELISA (0.5-1 ug/mL) The optimal working dilution should be determined by the end user.
Storage Buffer	Lyophilized from PBS, pH 7.4.
Storage Instruction	The lyophilized antibody is stable for at least 1 year from date of receipt at -20°C. After reconstitution with 0.01 M PBS, pH 7.4 or other diluents, this antibody can be stored in working aliquots at 2°C- 8°C for one month, or at -20°C for six months without detectable loss of activity. Aliquot to avoid repeated freezing and thawing.

Applications

- Enzyme-linked Immunoabsorbent Assay

Gene Info — IL6R

Entrez GeneID	3570
Gene Name	IL6R

Gene Alias	CD126, IL-6R-1, IL-6R-alpha, IL6RA, MGC104991
Gene Description	interleukin 6 receptor
Omim ID	147880
Gene Ontology	Hyperlink
Gene Summary	Interleukin 6 (IL6) is a potent pleiotropic cytokine that regulates cell growth and differentiation and plays an important role in immune response. The protein encoded by this gene is a subunit of the receptor complex for IL6. The IL6 receptor is a protein complex consisting of this protein and interleukin 6 signal transducer (IL6ST/GP130/IL6-beta), a receptor subunit also shared by many other cytokines. Dysregulated production of IL6 and this receptor are implicated in the pathogenesis of many diseases, such as multiple myeloma, autoimmune diseases and prostate cancer. Alternatively spliced transcript variants encoding distinct isoforms have been reported. [provided by RefSeq]
Other Designations	CD126 antigen OTTHUMP00000034320 interleukin 6 receptor alpha subunit
