

# PTK2 polyclonal antibody

Catalog # PAB16301

Size 50 ug

## Applications

### Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical (Formalin/PFA-fixed paraffin-embedded sections) staining in human breast with PTK2 polyclonal antibody (Cat # PAB16301).

## Specification

<b>Product Description</b>	Rabbit polyclonal antibody raised against synthetic peptide of PTK2.
<b>Immunogen</b>	A synthetic peptide (conjugated with KLH) corresponding to human PTK2.
<b>Host</b>	Rabbit
<b>Reactivity</b>	Bovine, Chicken, Dog, Hamster, Human, Monkey, Mouse, Rat
<b>Specificity</b>	Kinase domain of human.
<b>Form</b>	Liquid
<b>Purification</b>	Immunoaffinity purification
<b>Recommend Usage</b>	Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) (13 ug/mL) The optimal working dilution should be determined by the end user.
<b>Storage Buffer</b>	In PBS (0.09% sodium azide)
<b>Storage Instruction</b>	Store at 4°C. For long term storage store at -80°C. Aliquot to avoid repeated freezing and thawing.

**Note**

This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

## Applications

- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical (Formalin/PFA-fixed paraffin-embedded sections) staining in human breast with PTK2 polyclonal antibody (Cat # PAB16301).

## Gene Info — PTK2

Entrez GeneID [5747](#)

Protein Accession# [Q05397](#)

Gene Name PTK2

Gene Alias FADK, FAK, FAK1, pp125FAK

Gene Description PTK2 protein tyrosine kinase 2

Omim ID [600758](#)

Gene Ontology [Hyperlink](#)

**Gene Summary** This gene encodes a cytoplasmic protein tyrosine kinase which is found concentrated in the focal adhesions that form between cells growing in the presence of extracellular matrix constituents. The encoded protein is a member of the FAK subfamily of protein tyrosine kinases but lacks significant sequence similarity to kinases from other subfamilies. Activation of this gene may be an important early step in cell growth and intracellular signal transduction pathways triggered in response to certain neural peptides or to cell interactions with the extracellular matrix. At least four transcript variants encoding four different isoforms have been found for this gene, but the full-length nature of only two of them have been determined. [provided by RefSeq]

**Other Designations** focal adhesion kinase 1
