

# AIPL1 polyclonal antibody

Catalog # PAB16585      Size 100 ug

## Applications

### Western Blot (Tissue lysate)

Western blot analysis of AIPL1 in rat brain tissue lysate with AIPL1 polyclonal antibody (Cat # PAB16585) at (A) 1 and (B) 2 ug/mL .

### Immunohistochemistry

Immunohistochemistry of AIPL1 in human brain tissue with AIPL1 polyclonal antibody (Cat # PAB16585) at 2.5 ug/mL .

## Specification

<b>Product Description</b>	Rabbit polyclonal antibody raised against synthetic peptide of AIPL1.
<b>Immunogen</b>	A synthetic peptide corresponding to internal region 18 amino acids of human AIPL1.
<b>Host</b>	Rabbit
<b>Reactivity</b>	Human, Mouse, Rat
<b>Form</b>	Liquid
<b>Recommend Usage</b>	Western Blot (1-2 ug/mL) The optimal working dilution should be determined by the end user.

Storage Buffer	In PBS (0.02% sodium azide)
Storage Instruction	Store at 4°C for three months. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

## Applications

- Western Blot (Tissue lysate)

Western blot analysis of AIPL1 in rat brain tissue lysate with AIPL1 polyclonal antibody (Cat # PAB16585) at (A) 1 and (B) 2 ug/mL .

- Immunohistochemistry

Immunohistochemistry of AIPL1 in human brain tissue with AIPL1 polyclonal antibody (Cat # PAB16585) at 2.5 ug/mL .

- Enzyme-linked Immunoabsorbent Assay

## Gene Info — AIPL1

Entrez GeneID	<a href="#">23746</a>
Protein Accession#	<a href="#">NP_055151</a>
Gene Name	AIPL1
Gene Alias	AIPL2, LCA4
Gene Description	aryl hydrocarbon receptor interacting protein-like 1
Omim ID	<a href="#">604392</a> <a href="#">604393</a>
Gene Ontology	<a href="#">Hyperlink</a>
Gene Summary	Leber congenital amaurosis (LCA) accounts for at least 5% of all inherited retinal disease and is the most severe inherited retinopathy with the earliest age of onset. Individuals affected with LCA are diagnosed at birth or in the first few months of life with severely impaired vision or blindness, nystagmus and an abnormal or flat electroretinogram. The photoreceptor/pineal -expressed gene, AIPL1, encoding aryl-hydrocarbon interacting protein-like 1, was mapped within the LCA4 candidate region. The protein contains three tetratricopeptide motifs, consistent with nuclear transport or chaperone activity. AIPL1 mutations may cause approximately 20% of recessive LCA. [provided by RefSeq]
Other Designations	-
