

IL4R polyclonal antibody

Catalog # PAB18400 Size 100 ug

Applications

Western Blot (Cell lysate)

Western blot analysis of extracts from 293 cells, using IL4R polyclonal antibody (Cat # PAB18400).

Peptide "+" means "peptide blocking".

Immunofluorescence

Immunofluorescence analysis of A-549 cells, using IL4R polyclonal antibody (Cat # PAB18400).

Peptide "+" means "peptide blocking".

Specification

Product Description	Rabbit polyclonal antibody raised against synthetic peptide of IL4R.
Immunogen	A synthetic peptide corresponding to residues surrounding Y497 of human IL4R.
Host	Rabbit
Reactivity	Human, Mouse
Specificity	This antibody is specific to IL4R.
Form	Liquid

Purification	Affinity purification
Concentration	1 mg/mL
Recommend Usage	Western Blot (1:500-1:1000) Immunofluorescence (1:500-1:1000) ELISA (1:5000) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, 150mM NaCl, pH 7.4 (50% glycerol, 0.02% sodium azide)
Storage Instruction	Store at -20°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Western Blot (Cell lysate)

Western blot analysis of extracts from 293 cells, using IL4R polyclonal antibody (Cat # PAB18400).
Peptide "+" means "peptide blocking".

- Immunofluorescence

Immunofluorescence analysis of A-549 cells, using IL4R polyclonal antibody (Cat # PAB18400).
Peptide "+" means "peptide blocking".

- Enzyme-linked Immunoabsorbent Assay

Gene Info — IL4R

Entrez GeneID	3566
Protein Accession#	P24394
Gene Name	IL4R
Gene Alias	CD124, IL4RA
Gene Description	interleukin 4 receptor
Omim ID	147050 147781 609423
Gene Ontology	Hyperlink

Gene Summary

This gene encodes the alpha chain of the interleukin-4 receptor, a type I transmembrane protein that can bind interleukin 4 and interleukin 13 to regulate IgE production. The encoded protein also can bind interleukin 4 to promote differentiation of Th2 cells. A soluble form of the encoded protein can be produced by an alternate splice variant or by proteolysis of the membrane-bound protein, and this soluble form can inhibit IL4-mediated cell proliferation and IL5 upregulation by T-cells. All elic variations in this gene have been associated with atopy, a condition that can manifest itself as allergic rhinitis, sinusitis, asthma, or eczema. Two transcript variants encoding different isoforms, a membrane-bound and a soluble form, have been found for this gene. [provided by RefSeq
